

Stag Parkway Renews PRVCEF Silver Sponsorship Keller Marine and RV Become PRVCEF Bronze Sponsors

Camp Hill, PA—The Pennsylvania RV and Camping Education Foundation (PRVCEF) is proud to announce that Stag Parkway and Keller Marine and RV are 2011-2012 PRVCEF Sponsors.

Stag Parkway has continued their Silver Sponsor aiding the foundation's mission to support education programs for individuals who would like to make a career in the RV and private campground industry. Because they understand the value of continuing education and the benefits trained RV professionals bring to the consumer, Stag Parkway continues to support the education endeavor.

As a Bronze Sponsor, **Keller Marine and RV** feels that qualified technicians are essential to providing quality customer service. "Because today's consumer has very little free time, the industry that provides a hassle free vacation will win in the marketplace," Lori Morrow of Keller Marine and RV says. "We need to have well educated RV technicians so they can proficiently repair any problems which may occur, and get them back on the road quickly. Training is a key component for the continued growth of the industry."

PRVCEF, in partnership with Northampton Community College, has designed the RV Technician Distance Learning Program, which is based on the RVIA curriculum, and provides students the knowledge and skills they need to become a certified technician. The RV Technician Apprenticeship Program, another training opportunity, gives students both the education through Northampton Community College as well as hands-on experience as an apprentice at a local RV dealership. PRVCEF also makes scholarships available for students enrolled in the Northampton Community College Distance Learning Program as well as the National School of RV Park and Campground Management.

"The Foundation's continued success is directly linked to the unceasing support from industry leaders such as Stag Parkway and Keller Marine and RV," Rebecca Lenington Executive Vice President of the PA RV & Camping Association says. "Their efforts are not only an asset to the Foundation, but the RV industry as a whole."
